

## Import Compliance Certificate Webinar Program Series

The Global Supply Chain Leaders Group (GSCLG) is pleased to invite you to our Import Compliance Certificate Webinar Training program. This program provides you with a cost effective and time efficient opportunity to gain knowledge critical to your company's import operations.

Upon completion of the four modules, each participant will receive an Import Compliance Certificate, a copy of the program materials, and the opportunity to meet with the instructor in a one-on-one format to discuss residual questions.

This is an exceptional program that has been well received:

*"This is an outstanding program that has brought clarity to what appeared on the surface to be a very complex issue. Be certain, it is complex, but the straight-forward approach to classification along with the myriad of assistance tools and documents makes it a manageable situation".*

**- Terry Holcomb, General Manager, Betts Spring Company**
